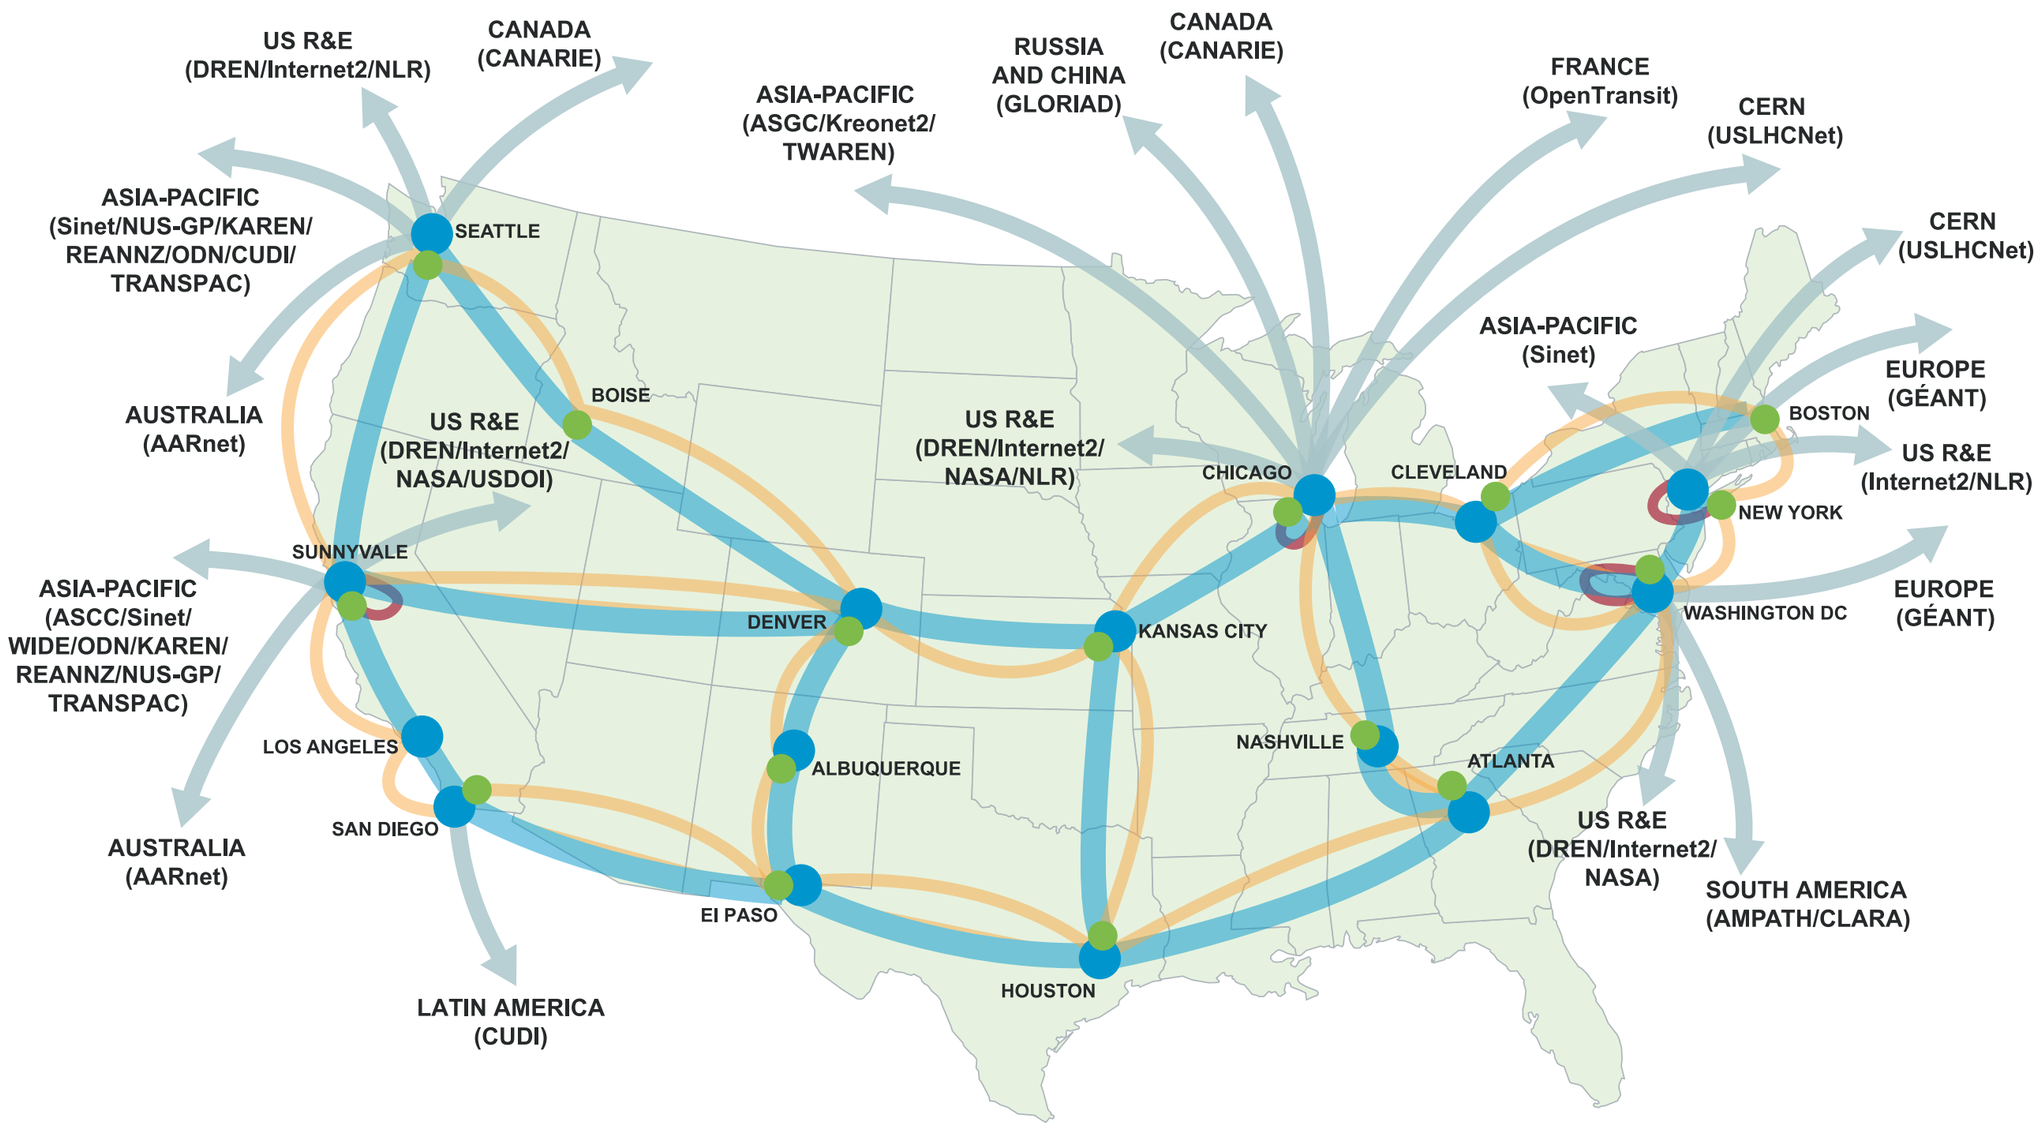
ESnet4

Connecting the U.S. Department of Energy Laboratories to the world of science.



The underlying optical fiber network is ~14,000 miles/24,000 km, and is built on a shared infrastructure with Internet2.

Core networks: scalable to 50-60 Gbps by 2009-2010, 200-600 Gbps by 2011-2012

ESnet Network as of December 2008
