

Center for Performance and Design of Nuclear Waste Forms and Containers (WastePD) Gerald Frankel (Ohio State University)

The mission of WastePD is to understand the fundamental mechanisms of waste form performance, and apply that understanding to design new waste forms with improved performance.

<https://efrc.engineering.osu.edu>

RESEARCH PLAN

WastePD will study the mechanisms of degradation of glass, ceramic and metallic waste forms and containers and develop the underlying science required to design materials with improved properties.
