

Kingsley Osaro Odigie

Graduate Institution: University of California-Santa Cruz

Graduate Discipline: Environmental Toxicology

Hometown: San Jose, CA

Relevant SC Research: Biological and Environmental Research

Research Interest:

I am interested in conducting research on the interplay of climate change, environmental contaminants, environmental resources and human health. My dissertation research focuses on the pyrogenic remobilization and transport of toxic metals.

About Me:

I am a Ph.D. student in Microbiology and Environmental Toxicology at the University of California, Santa Cruz. I graduated from San Jose State University with a double major in Microbiology and Forensic Science, and a minor in Chemistry. I research the interplay of climate change, environmental contaminants, environmental resources and human health. Additionally, I help

promote programs that recruit and train underrepresented individuals in STEM disciplines. In my free time, I like to spend time with my family and friends, participate in sport activities, cook, and travel.
